Montclair State University
Computer Science Masters Program

NSF S-STEM NECST Scholarship Program

$10,000 towards tuition and fees
This money will cover full tuition for students who are in-state residents.
(5+ awarded each year for maximum of two years ending in 2018)

To apply, apply to the Graduate Program at Montclair State University and email Dr. Katherine Herbert (herbertk@mail.montclair.edu)

Requirements for Program
• 3.0 in Pre-Calculus or a similar measure of potential in mathematics
• US citizens, nationals, admitted refugees or permanent residents
• Enrolled or enrolling fulltime in an MSU MS in Computer Science program
• Financial Aid Eligible (determined by Office of Financial Aid)

Helpful Deciding Factors
• Successful completion of activities like undergraduate research (in any field)
• Internships
• Campus activities
• Appropriate professional work experience as judged by the NECST Program committee
Montclair State University
Computer Science Masters Program

NSF S-STEM NECST Scholarship Program

General Description
- Large university with small class sizes (~15 students per class)
- All graduate courses taught by full-time faculty or industry leaders
- Students can readily get one-on-one attention from faculty as a part of any course of study.

New, Restructured M.S. in Computer Science
- More flexibility in course selection based on student’s interests and career direction
- Accommodates students with interdisciplinary interests who wish to take classes in other subjects
- New Masters of Science in Computer Science – Concentration in Information Technology. Designed to align with ACM and ABET standards (starting Fall 2013).
- Introduction of a Course Only study path in addition to Project and Thesis culminating experience.
